PRANJAL BHATNAGAR

Full Stack Developer | MERN Stack | React.js | Node.js

+91 9984780239 | pranjalbhatnagar6@gmail.com | linkedin.com/in/pranjal-bhatnagar6-ai | github.com/pranjalbhatnagar6-ai | Lucknow, India

CAREER OBJECTIVE

Computer Science student and Full Stack Developer with hands-on proficiency in JavaScript, React.js, Node.js, Express.js, MongoDB, HTML, CSS, and Git. Experienced in building responsive, scalable web applications end-to-end using the MERN stack, RESTful APIs, and component-based architecture. Seeking a Full Stack Developer Internship to deliver measurable contributions from day one.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) — SRIMT, Lucknow (AKTU) *2024 – 2028*

Intermediate (UP Board) *2021 – 2022*

SKILLS

Languages — JavaScript, Python, Java

Frontend — React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend — Node.js, Express.js

Database — MongoDB, Data Modelling

Full Stack — MERN Stack (MongoDB, Express.js, React.js, Node.js)

AI & Generative AI — Generative AI, Prompt Engineering, AI-Assisted Development, LLM Tools, AI API Integration, Vibe Coding

Tools & Technologies — Git, GitHub (Version Control), npm, VS Code

Development — API Integration, Authentication, Middleware, Debugging, Component-Based Development

Data & ML — Machine Learning, Data Analysis, Data Visualization

Soft Skills — Leadership, Team Management, Communication, Problem Solving, Critical Thinking, Collaboration, Adaptability, Time Management, Quick Learning, Presentation Skills

VIRTUAL INTERNSHIPS AND PROJECTS

Virtual Internship / Training

- Completed hands-on virtual learning and development activities focused on Web Development, Frontend Development, and AI-assisted development.
- Applied industry-relevant tools and technologies to build practical projects and strengthen software development skills.

E-Commerce Web Application *MERN Stack*

- Built a full-stack e-commerce application end-to-end using React.js, Node.js, Express.js, and MongoDB, following a component-based, RESTful architecture.
- Implemented product catalog management, shopping cart, user authentication, and CRUD operations through integrated REST APIs.

TransitOps Fleet Management *React.js*

- Built a role-based fleet management dashboard in React.js with reusable, component-based architecture and client-side state management.
- Implemented responsive UI components, operational dashboards, and data-driven interfaces consuming REST API data.

Heart Disease Risk Prediction *Machine Learning*

- Developed a machine learning application to predict heart disease risk using Python, Pandas, Scikit-learn, and KNN.
- Integrated the trained model with Streamlit to provide an interactive user interface.

Hackathon Projects

- **Built Focus Mirror AI**—TypeScript full-stack app (React + Vite frontend, Express backend). Implemented dev/build scripts,. env configuration, CORS, and frontend backend proxy for rapid local development.
- Integrated Gemini LLM for parsing and prioritized task planning; added deterministic heuristic fallback when API key is absent and designed typed REST endpoints to support the AI pipeline.

CERTIFICATIONS

- **Certificate of Achievement** — GDG Prayag Vibe Coding Hackathon *2026*
- **One-Year Personality Development Certification** — Freedom Employability Academy **(FEA)** *2019 – 2020*
